DETAILED ACTION

1. Claims 1-29 are pending in the present application.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-4 and 8-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garrecht et al. US Patent 6,567,812 B1 in view of Weschler US Patent 6,470,332 B1.

Regarding claim 1, Garrecht et al. teaches a method for storing a hierarchy of items in a search priority order [note: abstract], the method comprising: identifying a plurality of element definitions and a plurality of groups of elements

Art Unit: 2177

[note: column 11 lines 7-60] and

storing representations of the plurality of element definitions and elements of the plurality of groups of elements in a prioritized searchable data structure [note: store results 650 and create tree-shaped hierarchy 660 figure 7; column 13 line 20 through column 15 line 38; also column 17 lines 25-29].

Regarding claims 2-4, wherein the plurality of element definitions includes Internet protocol security policies ... wherein the searchable data structure includes an associative memory [note: Garrecht et al. column 19 lines 35-57].

The limitations of claims 8-16 parallel method claims 1-4; therefore they are rejected under the same rationale.

Although Garrecht et al. teaches the invention substantially as cited they do not explicitly teach decreasing search priority such that representations of each particular element definition of the plurality of element definitions is stored after representations of a set of particular elements of the plurality of groups of elements associated with said particular element definition and before representations of lower priority elements. Wechler allows a query string to be defined and used as a filter to retrieve results [note: abstract, figure 3 and 4, column 8 line 28 through column 10 line 3]. It would have been obvious to one of ordinary skill in the data processing art at the time of the invention to have combined Wechler with Garrecht et al. because the ability to filter results would give faster and more accurate search results.

Allowable Subject Matter

- 4. Claims 5-7 and 17-29 are allowed.
- 5. The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not teach or fairly suggest adding a particular security association entry based on the received packet to said ordered associative memory entries, the particular security association entry corresponding to the particular Internet Protocol security policy, and the particular security association entry being added to said ordered associative memory entries prior to the particular associative memory entry location as cited in independent claims 5, 17, 23 and 26.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Application/Control Number: 10/616,737

Art Unit: 2177

Wical US Patent 6,038,560

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Greta L. Robinson whose telephone number is (703) 308-7565. The examiner can normally be reached on Mon.-Fri. 9:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John E. Breene can be reached on (703) 305-9790. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
